Native

English

Fluent, business proficiency

INTERESTS

Active lifestyle with skiing, cycling and
kayaking. Enjoys hands-on maintenance of
house and home.

PROFILE

Experienced and versatile senior developer with a strong eye for optimizing workflows through the use of modern AI tools, test automation, and robust CI/CD pipelines. In my current role, the focus is on frontend development with particular emphasis on strong typing and high code quality, as well as AI-assisted development and continuous improvement of the associated routines. Combines solid engineering expertise with a proactive approach to automation to ensure efficient and structured deliveries.

WORK EXPERIENCE

Ignos AS — Senior Developer

10.2023 – Present

- Central role in developing and continuously maintaining the frontend of the company's application portfolio.
- Drives quality assurance and ensures code quality through systematic testing and thorough code reviews.
- Actively uses modern AI tools (GitHub Copilot, Claude Code) to streamline coding workflows, debugging, and documentation.
- Uses GitHub for source control and version management in daily team collaboration.

Bouvet ASA — Consultant – QA and DevOps

02.2019 – 09.2023

- Consultant engaged in complex software projects for **Equinor** through an established framework agreement.
- Lead developer of automated regression tests using **Cypress** for cloud-based Azure web applications built on React/.NET.
- Overall responsible for quality assurance and testing of new versions prior to production release.
- Close client contact during acceptance testing, requirements specification, and continuous optimization of agile working methods.

Powel AS (later Powel Environment AS) — Senior Technical Consultant / Systems Developer

08.2008 – 03.2019

Gemini Portal (2016–2019)

- Developed and customized a cloud- and web-based portal with real-time data and a map-based (GIS) interface for 150–200 municipal customers. Automated processes with PowerShell and administered IIS/SQL servers.

Gemini Desktop (2008–2016)

- Focused on automating build and deployment processes (WiX/MSI, NuGet) for a shared product platform. Also served as Scrum Master for the maintenance team.

Earlier Relevant Experience (Summary)

- **Acergy Norway AS** | Senior Planning Engineer / SW Developer (2002–2008) – Development of offshore survey software (C/C++, Perl/Tk) and agile project planning.
- **Ericsson AS** | Senior SW Developer & TTCN Expert (1993–2002) – Architecture and test automation for complex mobile networks (GPRS).
